CSU STEM-NET Faculty Fellow

The CSU currently has ten multi-campus collaborations, also known as affinity groups, which conduct collaborative activities in research and education on a breadth of topics. The latest group to be recently established is STEM-NET, and it may potentially constitute the most extensive of affinity groups since all 23 campuses are members. The expectation is that STEM-NET will eventually be self-funded through grants and contracts.

The STEM-NET vision is to make the CSU a worldwide leader in increasing the pipeline, preparation, graduation, and employment of outstanding, diverse STEM students. The mission is to enable CSU STEM leaders to share expertise and leverage system-wide opportunities to foster the implementation of global best practices in research, pedagogy, and learning as related to the STEM fields within the CSU.

STEM-NET faculty fellow serves to further develop the role of the university with STEM-NET while also serving to test the benefits of STEM-NET faculty fellows at campuses across the CSU.

Responsibilities:

1. Work with key faculty to develop and submit targeted STEM-based proposals, the subject areas of which are to be determined in consultation with the AVP ORSP.
2. Develop collaborative grants (educational- and research-based) with faculty.
3. Help promote a culture of scholarship on campus.
4. Take on new initiatives designated by the AVP ORSP.

Dr. Nina Robson (http://ecs.fullerton.edu/~nrobson/) currently severs as the STEM-NET faculty Fellow for CSUF.
