

CALIFORNIA STATE UNIVERSITY
FULLERTONTM

Urgench State university
good thoughts, good words and good deeds

Urgench State University, Uzbekistan
August 8 - 12, 2017

OVERVIEW

The conference aims to stimulate interactions among U.S. mathematicians and their counterparts in Uzbekistan and other countries, and serve as a catalyst for future collaborations. The main themes include: algebra and functional analysis, dynamical systems, mathematical physics and partial differential equations, probability theory and mathematical statistics, pluripotential theory, and analysis on metric spaces. A number of significant results have recently been established in these areas, which will be disseminated through the scheduled plenary and invited talks.

SPECIAL SESSIONS

- Algebra and Functional Analysis
- Dynamical Systems
- Mathematical Physics and Partial Differential Equations
- Probability Theory and Mathematical Statistics
- Complex Analysis and Pluripotential Theory
- International Research Experience for Students

PLENARY SPEAKERS

- Marco Abate (Pisa University, Italy)
- Shavkat Ayupov (Institute of Mathematics, Uzbekistan)
- Abdulla Azamov (Institute of Mathematics, Uzbekistan)
- Leonid Bunimovich (Georgia Institute of Technology, USA)
- Marcelo Disconzi (Vanderbilt University, USA)
- Azimbay Sadullaev (National University of Uzbekistan)
- Fedor Sukochev (University of New South Wales, Australia)
- August Tsikh (Siberian Federal University, Russia)
- Sabir Umarov (University of New Haven, USA)
- Efim Zelmanov (University of California, San Diego, USA)
