

Faculty Research Committee

A committee of the Academic Senate, the Faculty Research Committee's purpose is to review and recommend faculty intramural and junior/senior awards to the president for approval and distribution. The committee formulates, reviews and recommends policies regarding awarding of grants, which are administered by the CSUF Office of Grants and Contracts. The committee also assesses faculty needs in areas of research and creative activities, and makes recommendations to the Academic Senate and president. Further, the committee works with the campus community to enhance the university's research climate.
